## EDUCATION

**B.Tech in Information Technology - CGPA - 8.46**

**2019 – 2023**

*Mumbai University - Annasaheb Chudaman Patil College of Engineering*

*Navi Mumbai, India*

## TECHNICAL SKILLS

**Languages:** C++, C#, TypeScript, SQL, NoSQL

**Developer Tools:** Figma & Prototyping, VS Code, Visual Studio, Git, GitHub, Excel

**Technologies/Frameworks:** ReactJS, .NET Core, AG Grid, Firebase, TailwindCSS

## WORK EXPERIENCE

**GEP Worldwide** 

**June 2023 – Present**

*Software Engineer - Full Time*

*Onsite in Mumbai, India*

- Built and delivered the Sourcing Strategy Builder (SSB) to connect RFx with Auction Flip.
- Played a major role in developing the Negotiation Assistant Tool (NAT) to support RFx negotiations. Led backend design using .NET Core and NoSQL. Collaborated with PMs for feature planning and managed tasks using JIRA. Contributed to both backend and frontend (Angular with TypeScript).
- Currently working in the Autonomous Sourcing team, building a chat-style AI interface to assist with sourcing tasks.

**Arpa** 

**October 2022 – May 2023**

*Software Engineer & UI/UX Designer - Freelance*

*Remote*

- Developed a client-facing web-based admin portal using React.js and designed the UI/UX for its companion mobile app built with Flutter and Firebase.
- Later worked on designing and developing the architecture of a new product for the firm, including its mobile app and dashboard.

**Luster (Previously CryptoNaukri)** 

**July 2022 – One month**

*Software Developer Intern*

*Remote*

- Worked primarily on the frontend of the company's landing page and developer portal.
- Also managed hosting and deployment for the company's hackathon website during the internship. Improved the website's loading time from 6–7 seconds to 2 seconds.

## PUBLIC PROJECTS

**Avion**  | Figma, Prototype, UI/UX, ReactJS, Firebase

**January 2023 – May 2023**

- Designed end-to-end mobile app UI/UX and built an interactive prototype in Figma.
- Developed a responsive admin dashboard using ReactJS and Firebase.
- Contributed to backend architecture planning and feature flows.
-  [Mobile App Prototype](#)

**Aankh** | NodeJS, ExpressJS, MongoDB, Python, ReactJS

**February 2022**

- Built an ML-based e-proctoring tool with a live admin dashboard and easy integration with Google Forms and Microsoft Surveys.
- Offers smart checks such as DevTools detection, face-pose estimation, noise detection, and multiple tab detection.
-  [GitHub](#)

## EXTRACURRICULAR

**TSEC HACKS 2023**

**February 2023**

- Built **ShareSpace**, a web app that helps users find ideal roommates based on personal preferences while ensuring authenticity through anti-catfishing measures.

**RUBIX'22 Hackathon**

**February 2022**

- ★ First Runner-Up out of 75 teams: Developed **Aankh**, an e-proctoring system.
